Optimising Total Cost of Ownership
Advanced predictive technology for your operations

KEY BENEFITS

- **Improves OPEX** – optimise forecasting and inventory levels
- **Reduces downtime** – proactively increase asset availability and reduce the risk of unplanned stops
- **Increases safety** – plan for maintenance and parts replacement.

WE DISCOVER POTENTIAL

FLSMIDTH

Digital solutions for reliable productivity

The FLSmidth Total Cost of Ownership (TCO) Tool is a predictive software package that will increase your site productivity and extend your equipment life. A culmination of our expert know-how, this revolutionary tool will reliably forecast and optimise your operational and maintenance requirements.

Operating a business in today's world is becoming more and more complex. The ability to forecast operational and maintenance needs can have a major impact on your total cost of asset ownership, as well as overall productivity at your site.

At FLSmidth, we empower you with more than 135 years of productivity knowledge and experience. Advanced digital tools like our proprietary TCO Tool strengthen your business so it will run predictably and efficiently, now and into the future.
